

PALO VERDE NUCLEAR

Buckeye, AZ

Lamb provided Planning, Design Development, Site Selection/Design, and LEED Administration for this new 30,000 S.F. combination Joint Information Center and Emergency Operating Facility. The new center was constructed outside Palo Verde's EPZ.

The main EOF theater features a wall mounted array of 30 LCD flat panels integrated into an ergonomic control room layout with the command bridge at the rear of the room. Several dedicated rooms open onto the floor including Dose Assessment, NRC, FEMA, State/ County, and conference spaces. The JIC and a flex training and classroom area are co-located in the building.
