

AQUA PENNSYLVANIA

Bryn Mawr, PA

Lamb provided Planning, Design and Construction services for the complete renovation of this water system operation Control Center. Aqua serves portions of Philadelphia and the surrounding region from this 3,200 S.F. center. The Control Room has three custom operator positions, oriented for ergonomic viewing of the 2 high by 5 wide 42" LCD array. The Control Room also contains an orientation area with 65" LCD's for visitors and VIP's. The attached 900 S.F. Computer Room was renovated concurrently, with new cooling, UPS, FM-200 and raised access floor. Adjacent offices were also renovated to upgrade the entire second floor Control Room suite.
