

DIAMONEX

Allentown, PA

Lamb provided planning, design and construction services to completely renovate this 108,000 S.F. facility to support 15,000 S.F. of new Class 100 Clean Room space. The facility allows Diamonex to apply a diamond-based scratch resistant coating to ophthalmic lenses.

The Clean Room is accessed through air locks/gowning rooms. Other areas of the building include Coater Maintenance, Inspection/Q.C. Labs, Receiving/ Shipping and Warehousing. The project began in July with construction completed by the end of the following May, an elapsed time of just 11 months.
