

FIRSTENERGY

Akron, OH

Lamb provided turnkey Planning, Design and Construction Services to create this state of the art Transmission Control Center for FirstEnergy.

Thirteen new operator consoles are integrated into an ergonomic Control Room layout that includes a 70 foot long video wall. This wall is comprised of 67" diagonal video cubes, arranged in a 2 by 16 matrix.

The entire construction process from start of demolition through commissioning was fast-tracked and completed in eight weeks.
