

# KEYNES BROTHERS

Logan, OH

**L**amb provided Planning, Design, and Construction Management services to bring this Flour Milling Facility into compliance with OSHA standards and regulations.

Prior to Lamb's involvement, OSHA inspectors made an unannounced visit to the site as part of an increased enforcement effort for combustible dust hazards. Lamb provided planning and engineering expertise to determine the electrical classification of the areas. The pictures to the left show non-compliant receptacles, panels, and lights in classified hazardous areas.

Using each piece of the Planning, Design, and Construction process, Lamb's team created and implemented an action plan to correct the violations quickly and provide the client with a safe, compliant facility.
