

PACIFIC GAS & ELECTRIC

Vacaville, CA

Lamb provided Planning and Design Services for the control room of PG&E's 4,830 S.F. consolidated Grid Control Center.

There were a total of forty 67" SXGA+ video cubes configured in six separate 2 x 2 arrays for the operations, one 2 x 4 array for supervisory viewing, and the remaining eight cubes were located in the training room.

Evans Consoles with the electrically powered sit/stand work surface adjustment option were installed as well as dimmable LED operator task lights and a vertical slat wall for flexible mounting of monitors.
