

# PPL ELECTRIC UTILITIES

Allentown, PA

**L**amb provided Planning, Detail Design and Construction Phase Services for this 128,000 S.F. Operations Control and Data Center. The building houses PPL's Transmission and Distribution Control Rooms as well as Data Center space for the Corporate and SCADA IT functions.

The building is equipped with a Tier III set of redundant Mechanical and Electrical systems, along with a secure site and perimeter lock-down capability. Special site design features include "rain gardens" that conserve rainwater and act as security buffers. The new building is also designed to be energy efficient, qualifying for an Energy Star rating.
