

# UNITED AIRLINES

Chicago, IL

**L**amb provided Planning and Design Development for United Airlines' new System Operations Center. From here, United oversees and controls their worldwide system of over 5,600 flights per day.

This 43,000 S.F. facility contains 340 ergonomically designed sit/stand consoles, a display wall of eight 70" HD LED video cubes, and over fifty 60" flat panel displays placed throughout the facility, giving all operations personnel current situational awareness.

The SOC has fully redundant mechanical and electrical systems to maintain uninterrupted 24/7 operations.
