

# WYETH PHARMACEUTICALS

**L**amb provided Pre-Construction and Construction Management services for the renovation of a Penicillin Production Area. The renovations included HVAC ductwork, new exhaust fans and HEPA filtration units and installation of a new Product Packaging Room. The purpose of the renovation was to improve product containment, reduce operator exposure and enhance the facility to cGMP characteristics.

Lamb's services included reviewing the initial concepts and design documents, value engineering and constructability recommendations, purchasing, supervision, testing and field validation.
